

Risk Control – Tree Risk Management

Virtual Tree Masterclass... Save the Date!

At RMP Risk Control, we recognise that for many of our clients, the management and maintenance of trees is a key risk exposure. Climate change, reducing operating budgets and more people exercising locally than ever before; all place additional pressure on organisations to ensure the risks from managing trees are robustly controlled.

As we move into a new phase of the pandemic – ‘living with COVID-19’, there remains a level of uncertainty that there could be short notice changes to our freedom of movement and so the most sensible approach is to bring our masterclass to you virtually.

RMP Risk Control will bring you one hour webinar sessions focussed on a key aspect of tree risk management on three separate dates in October 2021 (10.30am-11.30am).

The topics we will cover are:

- 18th October – Trees – The Risk and Claims Landscape
- 22nd October – The Legal Landscape
- 29th October – Risk Management Systems.

The benefits of our virtual event are:

- We will cover a range of issues and provide solutions and advice for you to take back to your organisations to strengthen your existing tree management practices
- There will be an opportunity to ask questions to our expert speakers
- You can have multiple attendees from your organisation at one, two or all three of the webinar sessions.

For now.....SAVE THE DATE.....closer to the event, full details will be provided including booking and joining instructions.

If you would like to talk to us about this event please contact your RMP Account Director or our Director of Risk – Ashley Easen at: ashley_easen@gbtpa.com.
